DEVELOPMENT BRANCH

TO

N. Rama Rao, Esq., B.A., B.L.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Departments,
Bangalore.

SIR,

I have the honour to forward herewith for the information of Government a copy of a letter from Dr. D. Penman, Principal, The Indian School of Mines, Dhanbad, containing a good report of the work done at the above school by Mr. R. S. Batni, a Mysore Government scholar.

I have written to Dr. Penman that there is no vacancy at present in this department; but his strong recommendations will be kept in view when any occasion arises.

I beg to suggest that some suitable work may be found for Mr. Batni in the Department of Mines and Explosives, if any hand is necessary there, as he has qualified himself in metal mining.

I have the honor to be,
Sir,
Your most obedient servant,

A. M. Sen

Offg. Director,
Mysore Geological Department.

Copy of letter No. 44/17S, dated 9th June 1930, from
Dr. D. Penman, Principal, The Indian School of Mines, Dhanbad,
to The Director, Department of Geology, Bangalore, (Mysore State.)

I beg to refer to the scholarship held by Mr. R.S. Batni. Mr. Batni has held the Mysore Government scholarship of Rs 60/- per month for 4 years. At the end of July of this year he will have completed a full four years' course at this school. Last year in July Mr. Batni obtained the Certificate of the School in Metal Mining and was awarded a prize for standing first in the Principles and Practice of Metal Mining. He has been an excellent student throughout his career here and I think that he will be a man who would be of good service to you in your Department. I should be glad therefore to know whether you can employ Mr. Batni at the end of July. If so I do not know what pay you are willing to offer but I suggest a starting salary of Rs 200/- per month. This salary has been obtained by several students of this school.

An early reply will greatly oblige.

5 AUG 1930

Respected Sir,

I beg to bring the following to your consideration. I have passed in second class the Degree Examination of the Mysore University with and chemistry as my optional subjects and English French as my languages. I held the Mysore University Scholarship in English in my B.A. class, I stood first in that subject at the end of the first course.

After graduating in 1926, from the Central College Bangalore, I secured admission to the Benares Hindu University for the purpose of studying mining and metallurgy and after studying there for a period of three months, I appeared at the competitive examination for admission to the Indian School of Mines opened by the Government of India at Bhanbad in the province of Bihar and Orissa. Having been successful at the competitive examination I was selected for admission to the said school in Nov. 1926.

I was successful in my candidature for the Scholarship offered by the Government of Mysore and tenable at Bhanbad for a period of three years in the first instance and subject to a further extension of one year at the recommendation of the principal.

I have held this Scholarship for three years viz from ^{June} 1927-28 to ^{June} 1930. Although the complete course leading to the A.D. Scholarship Examination in Mining and Engineering covers a period of four years, there was

no need in my case to extend the Scholarship for the fourth year course. Since I got the Scholarship at the beginning of my second year, the award ~~of the~~ not having been made by the Government of Mysore in the first year.

I passed the certificate examination in Metal Mining Engineering, at the end of the third year, in first class securing the first prize in the "principles and practice of metal mining". I have also been awarded twice the first prize in English viz at the end of the first year as well as at the end of the certificate course. I have also obtained the first prize in French.

This year I have appeared for the diploma of Association in Mining Engineering and I have every reason to believe that I will be successful in this examination. Besides a thorough training in theory I have had an intensive practical training, according to the rules governing the course of study at the Indian School of Mines. I have four months' practical experience of the gold mines of Mysore and I have experience also of manganese, mica, copper and coal mines in the several provinces of India.

In view of the above facts, I request that I may be favoured with a suitable appointment. In this connection I may be permitted to mention that my fellow classmates have been holding appointments carrying a salary of Rs 200 per month, some being employed in copper mines of Khatola (B.N.R) and others in manganese and mica mines of C.P. and Bihar & Orissa respectively.

I have enclosed copies of testimonials.

Soliciting the favour of an early reply,

Yours

R.S. Batni

9

Indian School of Mines,
Dhanbad, 17th August 1930.

This is to introduce Mr. R.S. Batni a student of the 4th year at the Indian School of Mines. Mr. Batni was awarded the certificate in metal mining in July 1929 and obtained a high place in the order of merit. This July he has sat the examination for the Diploma of associateship of this School awarded after a 4 years course. He was awarded the prize in "Principles and Practice of metal mining" in the certificate examination 1929. He also secured the prizes for English and French.

He has enjoyed a scholarship from the Government of Mysore for 3 years. He has now completed his course and is available for service.

I recommend Mr. Batni as a keen, intelligent and conscientious young man who will make a competent mining engineer. I suggest that he be given the favour of a trial and I may mention that other students of his year have obtained posts commencing at Rs.200/- a month. I hope he may be given an opportunity to show his worth.

10

Indian School of Mines,
Dhanbad, India,
Dated the 25th July 1930.

I have great pleasure in testifying to the ability and character of Mr. R.S. Batani B.A., who has just completed his four years' course of study here.

During the four years he has been at the Indian School of Mines he has studied under my direction and passed with distinction in the following subjects:-

Building and Estimating,
Land and Mine Surveying,
Mine Accounts and Economics,
Metal Mining and Ore Dressing which include
practice in panning and vanning.

His energy and industry were applied to such good purpose that he approached the heads of the lists or actually topped the list, in the various interterminal and terminal examinations, so that he was one of the leading students of my class of 1928-29. He was awarded the first prize in " Principles and Practice of Metalliferous Mining " in the Certificate Examination, 1929.

During the whole time I have known Mr. Batani, his conduct has on all occasions been exemplary, and he possesses an exceedingly happy disposition.

He is thoroughly well equipped both by training and experience and disposition, for a Post of great responsibility.

Sd. S.K. Bose,
Professor of Mining & Surveying.

OFFICE OF THE CHIEF INSPECTOR OF MINES IN MYSORE.

No. 257
Encl. 4

Dated Oorgaum, 14th August 1930.
(S. India.)

FROM

C.E. SURYANARAYANA RAU, ESQ., Mem. A. I. M. E., & Co.,
~~REXBOCQUET, ESQUIRE, XXXX,~~

DEVELOPMENT BRANCH,

Ag. CHIEF INSPECTOR OF MINES IN MYSORE.

To

B. Narayanaswami Iyengar, Esq., B.A., B.L.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Departments,
Bangalore.

Sir,

I have the honour to forward herewith an application received from Mr. R.S. Batni praying for a suitable appointment in this Department. After graduating himself from the Central College, Bangalore, in 1926 he joined the Indian School of Mines at Dhanbad and passed the Certificate Examination in Metal Mining Engineering at the end of the 3rd year course in 1st class securing the first prize in the Principles and practice of mining. He was a Mysore Government scholar in that school and the Professors under whom he studied have given him good certificates, copies of which are enclosed with his application. This year, he has appeared for the Diploma of Associate ship in Mining Engineering, the results of which are not yet out, but he believes that he will come out successful in this examination.

Judging from his qualifications and the fact of his being a Mysorean - his father Mr. B. Subba Rao is Amildar at Holenarsipur and a Mysore Government scholar, I recommend that he be appointed a Probationer in this Department.

linked
let Mr. Bocquet, in para 6 of his letter No. 1993 dated 14-8-30 has proposed that the Probationer may be given a pay of Rs. 80/- plus Rs. 20/- house rent during the period of probation of 2 years and then confirmed if satisfactory as Junior Inspector on Rs. 125-25/2-250. Considering the qualifications of the applicant and in view of the statement

statement of the Principal of the Indian School of Mines that his class-mates with similar qualifications have been started at Rs.200/- per month, presumably in private concerns, I think it will be fair to start this Probationer on Rs.100/- plus Rs.20/- house rent, the probation period being limited to one year only. If he proves himself satisfactory he may be confirmed as Junior Inspector of Mines at the end of this period.

I have the honour to be,

Sir,

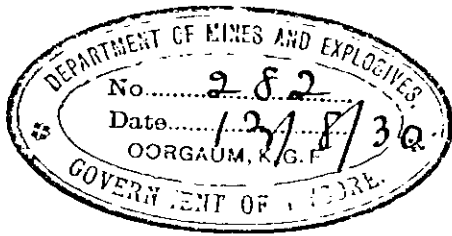

Your most obedient servant,

C. E. Srinivasan
Ag. CHIEF INSPECTOR OF MINES
IN MYSORE.

R.S.

To,

The Chief Inspector of Mines
Oorgaum

Holenarsipur.
12th Aug 30.

Respected Sir,

I beg to bring the following lines to your kind consideration. I have passed in second class the B.A. Degree Examination of the Mysore University with physics and chemistry as my optional subjects and English and French as my languages. I held the Mysore University Subjects Scholarship in English in my B.A. class, having stood first in that subject at the end of the first year course.

After graduating in 1926 from the Central College, Bangalore, I secured admission to the Benares Hindu University for the purpose of studying mining and metallurgy and after studying there for three months, I appeared at the competitive examination for admission to the Indian School of Mines, opened by the Government of India, at Dhanbad in the province of Bihar and Orissa. Having been successful at the competitive examination, I was selected for admission in Nov. 1926.

I was successful in my candidature for the Scholarship offered by the Government of Mysore and am able at the Indian School of Mines for a period of three years in the first instance and subject to a further extension of one year at the recommendation of the principal.

12

I have held this scholarship for three years viz from 1927-28 to 1930. Although the complete course leading to the Associateship Examination in Mining Engineering covers a period of four years. There was no need in my case, to extend the scholarship for the fourth year course, since I got the scholarship at the beginning of my second year course the award of the scholarship not having been made in the first year.

I passed the Certificate Examination in Metal Mining Engineering, at the end of the third year course, in first class, securing the first prize in the "Principles and Practice of metal mining". I have also been awarded twice the first prize in English :- at the end of the first year as well as at the end of the Certificate course. I have also ~~this year~~ obtained the first prize in French.

This year I have appeared for the diploma of Associateship in Mining Engineering and I have every reason to believe that I will come out successful in this examination. Besides a thorough training in theory, I have had an intensive practical training, according to the rules governing the course of study at the Indian School of Mines. I have experience of manganese, mica, copper and gold mines in addition to coal mines.

In view of the above facts, I request that I may be favoured with a suitable appointment. In this connection, I may be permitted to mention that my fellow class mates have been holding appointments carrying a salary of Rs 200 per month, some being employed by the Indian Copper Corporation Malabarani (Bihar & Orissa) and a few others by the Central provinces Manganese Co and the Hazaribagh Mica Company.

I have enclosed copies of testimonials.

Soliciting the favour of an early reply to the address given below.
